

Earthwise offers compact, easy to install and operate on-site chemical generators designed for minimal maintenance and ultimate simplicity.

Similar to the thousands of larger installations around the world, this small-scale chemical generator can be retrofitted into existing infrastructures. Just load with salt and you're ready to go!

**APPLICATIONS**

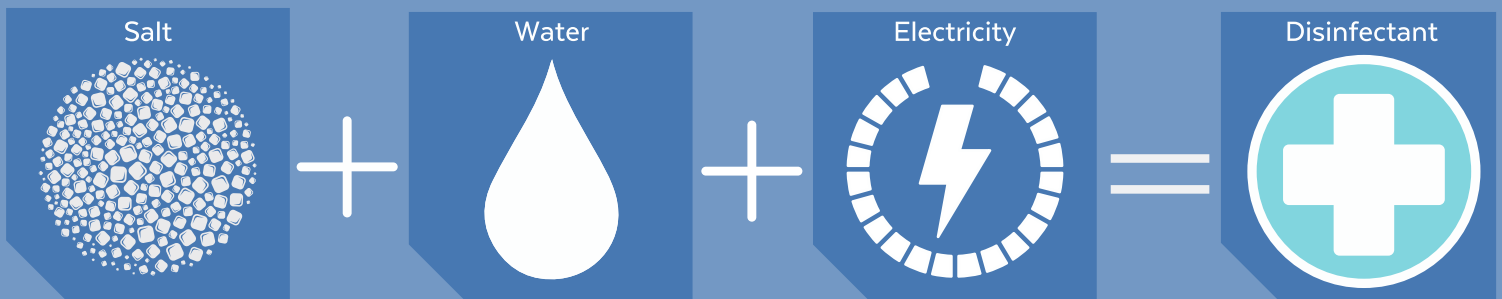

**INDUSTRIES**

- Cooling Water
- Drinking Water
- Wastewater
- Process Water
- Clean in Place
- Pools & Spas

- Water Utilities
- Commercial
- Institutional
- Industrial
- Food & Beverage
- Oil & Gas

## Electrolysis Process

The electrolytic cell of an on-site generator uses common salt combined with water and electricity to generate high performance disinfection chemistries, eliminating the need to transport and store hazardous chemicals.

Earthwise works with a number of suppliers to provide Full Water Solutions to help you keep up with demand in times of low supply.
