

**WATER HYGIENE  
ACTIVE WATER MANAGEMENT  
FLOW CONTROL**

**RADA CONTROLS - A KOHLER COMPANY  
INTELLIGENT CARE FAUCETS**

**Water Safety at its Simplest**

Rada's technologies improve environmental and financial efficiency, as well as enhance the health and wellbeing of patients and staff by optimizing their safety in the fight against infections.

- Reduce the risk of waterborne infections with duty flush and thermal disinfection options
- Limit opportunities for cross-contamination through non-touch controls
- Smart duty flushing removes the risk of human error and saves water
- Collect key statistical data on usage patterns and compliance with public health mandates, ASSE and ASHRAE Standards
- Manage water usage with pre-set temperatures and flow

**Active water management  
you can rely on**

Make your Water Management Program easier to manage with technology that manages itself. Gone are the days of reviewing logs and hoping the flushing was done as marked.

Rada faucets are programmed to flush and heat-disinfect on the schedule you set in your BAS. Time, temperature and errors are recorded automatically, providing greater accuracy and control than a manual program.

Facilities Management will appreciate the labor savings as well.

# Safe Simple Effective Legionella Control

- Non Touch IR flow control
- Non Touch capacitive temperature control
- Brass valve engine (no plastics)  
Integral smooth bore copper outlet pipe
- Open bore flow insert, removable for easy cleaning
- Copper inlet tails
- High internal valve flow velocity
- Air tested at factory

## Supporting long-term sustainability for the healthcare industry

Rada's new generation of non-touch digital taps directly support health systems to deliver water safely to staff, patients and visitors.

Take active water management to the next level with smart technology.

Easy to install and program.

A simple solution to water safety and savings.
